-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 5 and 15 it is unclear if the limitation "a predetermined value" is the same predetermined value recited in claim 4 and 14.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Abo et al (US 6,253,137).

Abo et al disclose a control system comprising: an oil pump (51) operative to produce an oil pressure and an oil flow amount which are supplied to the CVT (col. 3 lines 32-39); a pressure regulator valve (53) operative to regulate the oil pressure

Art Unit: 3682

produced by the oil pump; a belt lubricating oil supply passage for supplying oil to the belt on a downstream side of the pressure regulator valve (col. 6 lines 23-25); engine operating condition detecting means (84) for detecting an engine operating condition and generating a signal indicative of the engine operating condition detected (col. 8 lines 46-53); and a controller (76) for controlling the oil flow amount based on the signal (col. 8 lines 54-56), the controller being programmed to: calculate a CVT input torque based on the signal (col. 4 lines 35-42); calculate a required belt lubricating oil flow amount to be supplied to the belt on the basis of the signal and the CVT input torque (col. 6 lines 17-27); determine a minimum speed of the oil pump based on the required belt lubricating oil flow amount (col. 4 lines 63-67); control the oil pump at the minimum speed (it is inherent that once the controller determines the required oil flow amount, the speed at which the pump operates will be the required minimum speed), an oil temperature sensor (84), a throttle position sensor (62), a primary pulley (31), a primary pulley speed detecting means (66), a secondary pulley (32), a secondary pulley speed detecting means (67), and an oil cooler (56).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure
